

Air Cooling System

P\N: 536150

Elevate your aircraft's performance with our innovative Release ADT System. Designed to deal overheating during ground operations, our system offers seamless integration and unparalleled protection for crucial components like receivers and telemetry electronics.

Experience efficient cooling and peace of mind with our sustainable, reusable, and rechargeable solution. Ensure optimal performance for your UAVs, even in the toughest conditions.

Package include:

- 🌀 Battery indicator
- 🌀 Charger
- 🌀 RBF tag

Details:

180(A) X 215(B) X 230(C) mm

25.2 Volts
